

## **Position as Research assistant**

**Institut Botànic de Barcelona (IBB), CSIC-CMCNB**

### **GENERAL INFORMATION**

The project *Floral flow: The establishment and consequences of mutualistic plant-insect relationships for the evolution of terrestrial ecosystems* is seeking a research assistant (**2-year position**) to work on the preparation of databases to be used in the project.

Gross salary around 32,000€/year.

### **YOUR PROFILE**

BSc in Biology, Paleontology, Environmental Sciences, Geology or similar, with knowledge on **Angiosperm diversity**. Ideally with MSc in a related topic. Additional merits are valuable (publications, knowledge on geology or fossil record).

Good communication and teamwork skills, who can work independently and in goal-oriented manner, enthusiasm and engagement.

Excellent written and oral English.

### **ENVIRONMENT**

The applicant will be based at the Institut Botànic de Barcelona (Barcelona, Spain).

The IBB is an international recognized institution for its research in plant and insect-plant science, with a collaborative interdisciplinary work between botanists and entomologists.

### **HOW TO APPLY**

Interested applicants should submit a **single PDF** including a motivation letter describing their merits, together with an up-to-date CV to David Peris ([david.peris@ibb.csic.es](mailto:david.peris@ibb.csic.es)) before the 18th of September.

The expected starting date for this position is January 2025.
